FOR IMMEDIATE RELEASE  
10 January 2018

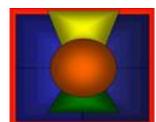

### **Setracon Inc. announces the unveiling of ESRMra™ Risk Assessment Software**

**Setracon Enterprise Security Risk Management Services announces the release of our uplifted risk assessment software ESRMra™.**

After a year of focused development, we are proud to announce the unveiling of ESRMra™, an information technology platform for conducting all hazards risk, threat, and vulnerability assessments. The incorporation of data analytics and business intelligence into the platform has enabled us to provide detailed critical risk information to Executives in a concise view. Providing the right information, at the right time, gives Executive Leadership the ability to understand enterprise security risk and its opportunities.

*According to Jeffrey A. Slotnick CPP, PSP President of Setracon Inc. “we have aligned our software and processes with the ANSI/ASIS/RIMS RA.1-2015 risk assessment standard, ISO 31000 Risk Management, ISO 28000 Security Management, ISO 22301 Business Continuity and the NIST Cyber Security Standard, to create an all hazards risk assessment platform which is highly capable of providing Critical Enterprise Security Risk Information within 3 mouse clicks of an Executives fingertips.”*

*With this release, we have added significant functionality to include a configurable CSO report, and an analytics tab which portrays Risk profiles, Crime Statistics, and program maturity for immediate informed Enterprise decision making.*

*Michael Keneipp, CTO said “Our software development team has been hard at work for the past year improving our risk assessment software. The improvements to our Risk Assessment console provided our clients with critical risk information and business intelligence for analytical decision making.*

Based in industry standards Setracon Enterprise Security Risk Management Services provides consulting, information technology platforms, and training in support of achieving Enterprise alignment with ISO 28000 Security Management, ISO 31000 Risk Management, ANSI/ASIS/RIMS RA.1-2015, including best practices and standards in Facilities Physical Security, and Physical Asset Protection.

Setracon Inc. is a 19-year-old Veteran owned company committed to providing subject matter expertise, consulting, training and information management services to align risk, resilience and security solutions with organizational strategies and goals. Our information management platforms enable the Enterprise to mine data that becomes information and actionable intelligence. In doing so we ensure that security becomes a vital and compelling asset which protects and extends the value of the Enterprise while keeping an open and inviting facility. Due to our industry knowledge, detailed reports, a focus on excellence, collaborative attitude, and a reputation for customer service Setracon enjoys long term loyalty by many of our clients.

We are certified Lead Auditors capable of auditing to the following ISO and ANSI Standards

- RABQSA-RES-Resilience Management Systems Auditing Security, Preparedness, Crisis, Continuity, and Recovery Management
- Security Management ISO 28000
- Resilience Management ISO 28002
- Business Continuity Management ISO 22301
- Risk Management ISO 31000
- ANSI/ASIS/RIMS RA.12015 Risk Assessment
